## **Mitutoyo**

Measurement Data Wireless Communication System U-WAVE

SMALL TOOL INSTRUMENTS
AND DATA MANAGEMENT

## What is the U-WAVE Series?

"U-WAVE", the measurement data wireless communication system, collects data in the inspection process swiftly and accurately, and increases a company's competitiveness based on detailed data analysis.

In addition, together with MeasurLink, "IoT of Quality Control envisioned by Mitutoyo" can be achieved.

#### **Achieve Smart Measurement**

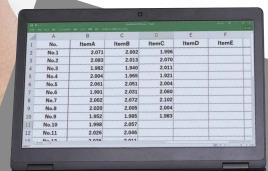

Measurement Data Wireless Communication System

U-WAVE

This is a system that transmits data from Mitutoyo Digimatic gages to software such as Excel or Notepad via wireless communication. It saves time and eliminates misinput, helps achieve cost reductions and better efficiency while maintaining excellent operability.

From a Digimatic gage connected with U-WAVE

#### **Advantages of Introducing U-WAVE**

#### Higher Efficiency

Data can be input by single button operation! Since there is no need for manual input misinput does not occur. Efficiency is greatly improved!

## Centralized Data Management

Measurement data can be managed centrally!
"Visualization of quality" helps prevent the generation of defective products!

#### Cost Reduction Effect

Easily connected to the Digimatic gage\* currently in use!

A system configuration reducing the initial and running cost is possible.

## **U-WAVE resolves** measuring process issues!

#### Issue

Manual input of measurement data is inefficient and frequently generates misinput.

#### Solution

U-WAVE immediately transmits the measurement data to your PC. Misinput due to manual input can be eliminated, and therefore data reliability and operational efficiency is improved.

#### Issue

Loading measurement data via wireless is seen as desirable but justifying any high initial investment is difficult.

#### Solution

No high initial investment required because U-WAVE can be inexpensively connected to your existing Digimatic gages. No need to purchase replacements.

#### Issue

Since multiple operators use Digimatic gages, it takes a long time for data collection and Pass/fail judgment.

#### Solution

Up to 100 Digimatic gages can be registered to a single U-WAVE receiver on the PC side. The data is automatically entered separately in the Excel sheet. Therefore, data collection and Pass/fail judgment are easily performed.

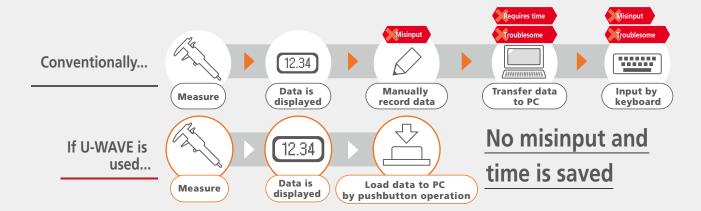

## Speedy and Reliable Data Collection and Pass/fail Judgment Improves Manufacturing Competitiveness

## Higher Efficiency

#### LED or a buzzer notifies data reception

Confirmation that data was successfully received.

Note: The buzzer sound is only available with the buzzer equipped model.

- Normally received: green LED blinks
- Buzzer sounds twice briefly

Illy Patented in Japan

Buzzer sounds once

### Dustproof and water resistant IP67 model

The water-proofed transmitter is resistant to water and dust.

Cordless enables freedom of movement

Flexible layout of measurement site

Misinput generated by manual input is eliminated

Stable wireless communication

## Advantage

## **Centralized Data Management**

#### **Operation in an Excel sheet**

The data can be directly written into an Excel sheet.

## Digitalization enables easy data collection and analysis

The measurement data from each process can be stored and managed centrally.

#### Multiple gages can be connected at the same time

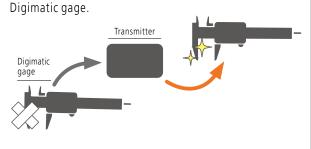

Note:Receiver not necessary when using with Mitutoyo Bluetooth® U-WAVE fit

## **⟨ Cost Reduction Effect ⟩**

## If a Digimatic gage is damaged, operation can be continued using a different gage

The transmitter can be reconnected to a different Digimatic gage

## Connectable to any of your existing Digimatic gages

No need to buy a replacement if your tool is equipped with the Digimatic function.

## Approximately 400,000 continuous data transmissions are possible

Just one CR2032 lithium battery provides power for about 400,000 data transmissions.

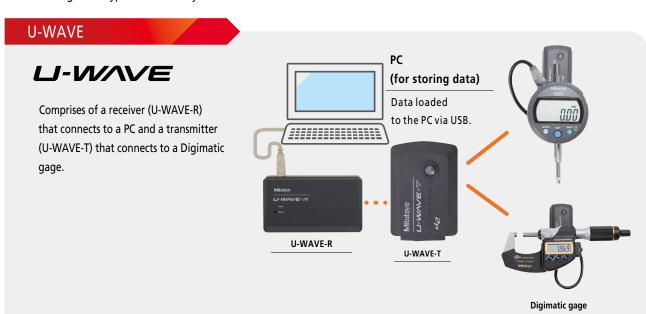

\* When the battery is used with U-WAVE-TM/TC/T. The battery life is approx. one year under normal use when used with U-WAVE-TMB/TMC.

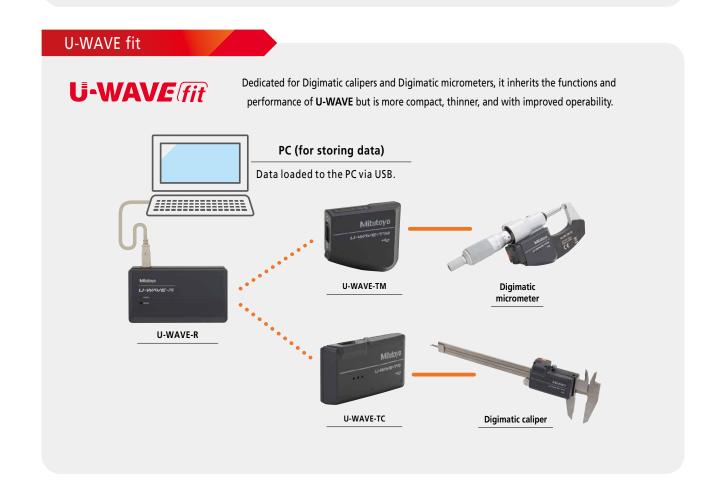

## Type of U-WAVE

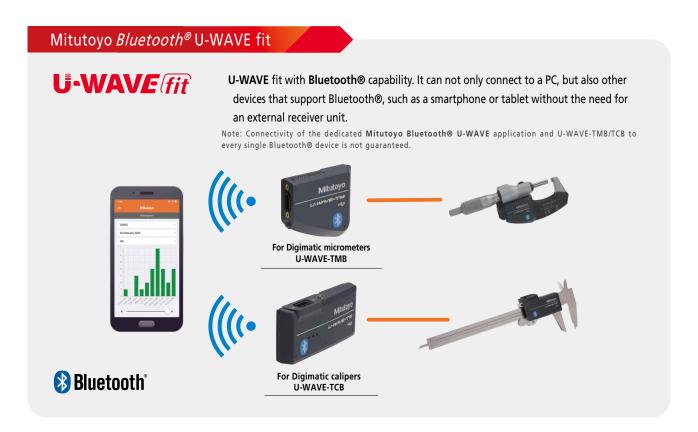

Convenient data collection tool and quality control software

The following three types are currently available.

#### Function comparison table

	U-WAVE	U-WAVE fit*1	Bluetooth® U-WAVE fit*1	
Transmission method	Original <based ie<="" on="" td=""><td colspan="3">Original   Value on IEEE802.15.4 (2.4 GHz)&gt;</td></based>	Original Value on IEEE802.15.4 (2.4 GHz)>		
Communication distance	Approx. 20 m	Approx. 16 m (line of sight)		
Connectible model	Digimatic gages	Digimatic calipers, mici	rometers and indicators	
Dedicated application/ software	U-WAVEPAK (included USB-IT	with U-WAVE receiver) <b>PAK*</b> <sup>2</sup>	U-WAVEPAK-BW U-WAVEPAK-BM U-WAVE Navi USB-ITPAK* <sup>2</sup>	

<sup>\*1</sup> Please check the list of compatible models since the unit may not be attachable to some models.

 $<sup>^{\</sup>star}2$  Please note that USB-ITPAK may not be recognized if your computer's OS build is old.

## **Typical Measuring Issues Solved**

In combination with application software USB-ITPAK V2.1, better efficiency in quality assurance can be achieved.

Issue

To record the measurement results, on a chart, from three points on a mass-produced product measured using two gages.

Solution

If you set the procedure of inputting data to the Excel sheet with USB-ITPAK V2.1, the measurement data is automatically entered.

\*Please refer to "Option" at the bottom of this page.

Measure the workpiece dimensions, X and Y, with a micrometer. Then, measure H with a caliper. Finally, visually check the appearance and judge OK or NG. Perform the above for 5 workpieces consecutively.

Point

Measurements in order

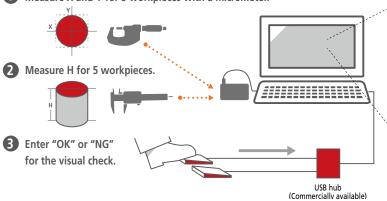

The designated table will be created by measuring and transmitting data for X and Y of 5 workpieces, measuring and transmitting data of H, and then entering the result of visual check.

Point

Set the sequential measurement input order

Designate the Excel sheet, select the data loading range, loading order, and allocate the ID for each cell.

Measure X and Y for 5 workpieces with a micrometer.

Designated Excel sheet

		Α	В	C	D	E	F		
	1	Setting	1	2	3	4	5		Input
	2	Dimension X	10.025	10.033	9.964	10.031	10.046		range of —micrometer
	3	Dimension Y	9.982	10.017	10.008	9.996	10.027		Input
	4	Dimension H	29.97	30.02	30.07	29.96	30.04	4	_range of caliper
	5	External Appearance	OK	OK	NG			_	_ Input range of visual
ı								П	liudament

Data will be input one by one in the registered order to the cells of the Excel sheet designated beforehand.

### **Option**

#### Measurement Data Collection

#### **USB-ITPAK V2.1**

USB-ITPAK V2.1 is optional software to be installed in the PC connected with U-WAVE-R. It enables setting up the procedure to input the measurement data received from U-WAVE-R to the Excel sheet and to achieve greater inspection efficiency and enhanced credibility.

The combined use with U-WAVE will improve the operational efficiency of the inspection work.

Best suited for recording data in mass-production inspections where the procedure is repeated every day.

## Case Study

Data input by multiple operators

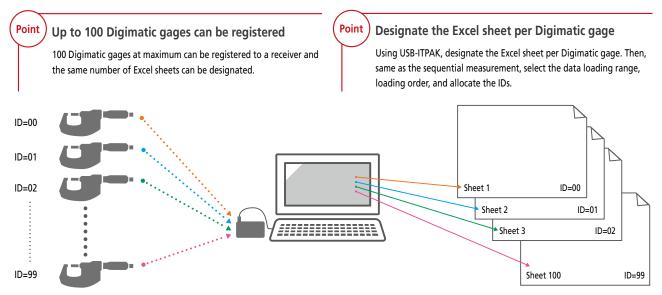

Issue

To sort data into separate Excel sheets per Digimatic gage in the inspection process.

Solution

The data collected by multiple operators can be individually set to be input to the designated cells in the Excel sheet.

Input data of each Digimatic gage in order into the designated cells of the separate Excel sheet.

Multiple measurement data (via U-WAVE-TM/TC/T) can be sorted into the separate Excel sheets without requiring you to program macros.

#### **■** Features of USB-ITPAK V2.1

The measuring methods can be configured, such as sequential measurement, batch measurement, individual measurement and more.

Data can be canceled by a single operation of the foot switch or function key.

Input range can be specified per Digimatic gage, which reduces the chance of a misinput.

Data input or cancellation can be instructed globally in multiple-point simultaneous measurement.

The Excel sheet can be automatically called for data input.

The cursor movement after data input can be set to enable automatic input.

## Case Study

Case 3

Batch measurement using timer

#### Issue

To measure displacement using multiple Digimatic gages and automatically obtain data in a certain input interval.

#### Solution

Batch timer input is available using the USB-ITPAK batch measurement function and the optional timer input function.

Specify the interval for measuring the displacement of the workpiece and collect data at once.

Point

Batch measurement with all the Digimatic gages

Data can be obtained globally by a foot switch operation.

#### Point

Timer input option

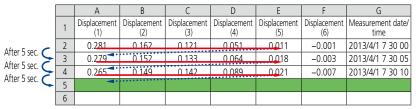

Using USB-ITPAK, the data request interval can be set by hours, minutes, and seconds

(0.0 sec. to 24 hrs.).

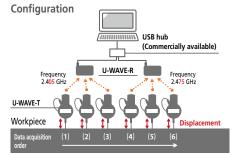

Point

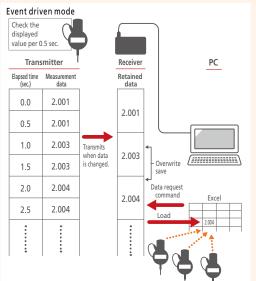

**Batch timer input** 

Data can be obtained at the desired interval using the timer input function in batch measurement.

- To perform simultaneous measurement using U-WAVE, a special order software U-WAVEPAK (event drive) is required.
- Since the data refresh interval of the event drive is fixed at 0.5 seconds, the setting range is from 0.5 seconds to 24 hours.

Two modes for flexible measurements

#### "Button driven mode" and "Event driven mode"

#### Button driven mode

By pushing the Data button of digimatic gage/dedicated cable for U-WAVE/ connecting unit, indicated values can be transferred to the receiver.

#### Event driven mode

- 1) U-WAVE-TM/TC/T checks the displayed value of the Digimatic gage at 0.5 sec. intervals, and transfers data if the value is changed.
- 2) U-WAVE-R overwrites data in the storage.
- 3) Sends data responding to the data request command.

#### Enables automatic data load

Without operating the send button of the Digimatic gage, data can be obtained automatically from multiple Digimatic gages.

- The battery life of the U-WAVE-TM/TC/T is shortened (20 days in continuous operation). U-WAVE is equipped with a function to avoid radio wave interference, and enables successful simultaneous data transmission of three U-WAVE-T units per U-WAVE-R. To perform simultaneous data transmission with more than three units of U-WAVE-T, an additional U-WAVE-R and set different frequencies (15 channels) to assure reliable wireless communication.
- "Event driven mode" is not available for U-WAVE-fit Bluetooth® within USB-ITPAK

## U-WAVE fit

#### Receiver

#### U-WAVE-R

- Receives measurement data and transmits to the PC via USB.
- Since USB bus power system is used, a battery or adapter is not required.
- The identification ID and frequency to be used can be set using supplied software U-WAVEPAK.
- The data load function to Excel, etc. is supplied as a standard accessory.

# PC (for storing data) Data loaded to the PC via USB. JSB. is t U-WAVE-R

**U-WAV**Efit

U-WAVE-TC

U-WAVE-T

#### **Transmitters**

#### U-WAVE-TM/TC/T

- Transmits the measurement data displayed on the gage to U-WAVE-R.
- Compact, cable-less design provides a better fit with the Digimatic gage and better operability.

## U-WAVE (TIT) U-WAVE-TM

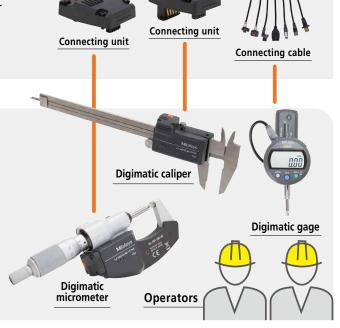

#### Connecting unit/connecting cable

- A compact connecting unit connects the U-WAVE-TM/TC/T transmitter to the Digimatic gage.
- A dedicated cable connects the U-WAVE-T transmitter to the Digimatic gage.

#### Digimatic gages

#### Compatibility

- U-WAVE-TM/TC can be used with most of the calipers and micrometers equipped with the Digimatic output function.
- U-WAVE-T can be used with all the Digimatic gages equipped with the Digimatic output function.

#### **Transmitters**

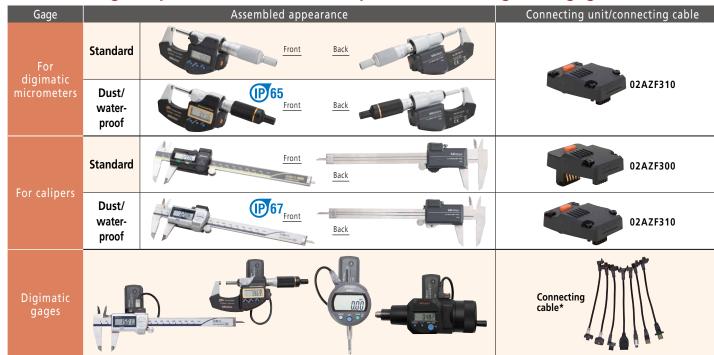

#### **U-WAVE** fit

With functions and performance inherited from U-WAVE-T, a compact and thinner design provides a neater solution by eliminating cabling around the Digimatic gage and thus better operability!

U-WAVE-TM for micrometers and U-WAVE-TC for calipers are available, both the buzzer type and IP67 type. The buzzer type notifies the normal reception of data by LED and buzzer sound. The dust/water-proof IP67 type is designed for a harsh environment and as such is only equipped with LED notification of data reception.

#### Connecting compatible micrometers, calipers and other Digimatic gages to U-WAVE

## Type of Transmission Unit

#### **U-W/VE**

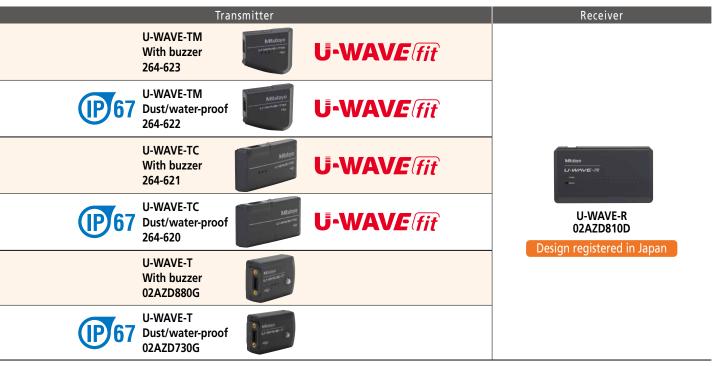

This product successfully introduced U-WAVE to the market.

For digimatic micrometers, calipers, indicators and micrometer heads

The buzzer type and IP67 type are available. The buzzer type notifies the normal reception of data by LED and buzzer sound. The IP67 type is designed for a harsh environment and as such is only equipped with LED notification of data reception.

Note: Select according to the Digimatic gage to be connected. Refer to pages 24 and 25 for connecting cables.

## Manage Measurement Data Centrally and Wirelessly on a Smartphone, Tablet or PC

## Mitutoyo Bluetooth® U-WAVE fit

#### **U-WAVE-TMB/TCB**

More compact and thinner for a better fit with Digimatic gages, and featuring improved operability and performance inherited from its predecessor, U-WAVE-TMB/ TCB is now available with Bluetooth® wireless technology. No receiver is required, and one PC can connect up to seven units of Mitutoyo Bluetooth® U-WAVE fit. Dust /water-proof models are also available for arduous shop floor usage.

Note: Connectivity of this application software and U-WAVE-TMB/TCB to every single Bluetooth® device is not guaranteed.

#### Major Advantages of Introducing Mitutoyo Bluetooth® U-WAVE fit

Does Not Require a Receiver

Measurement data can be transmitted to PCs, tablets and smartphones without a receiver if they are equipped with Bluetooth® wireless technology.

#### **Cost Reduction Effect**

System can be configured at reduced cost, just by connecting to an existing Digimatic gage.

#### **Higher Efficiency**

Data can be input by single button operation. Since there is no need for manual input misinput does not occur. Efficiency is greatly improved.

Centralized Data Management

Measurement data can be managed centrally.
"Visualization of quality" helps
prevent the generation of
defective products.

#### **Easy Data Saving**

smartphones and tablets independently of the measurement site.

You can use with confidence since it is labeled with the wireless certification number acquired in the country of purchase.

## With Bluetooth® wireless technology for Easy Pairing with Your Digimatic Micrometer or Caliper

U-WAVE-TMB/ TCB is compatible with most Digimatic micrometers and calipers.

Refer to pages 28 to 42 for attachable digimatic gages

**Digimatic micrometers** 

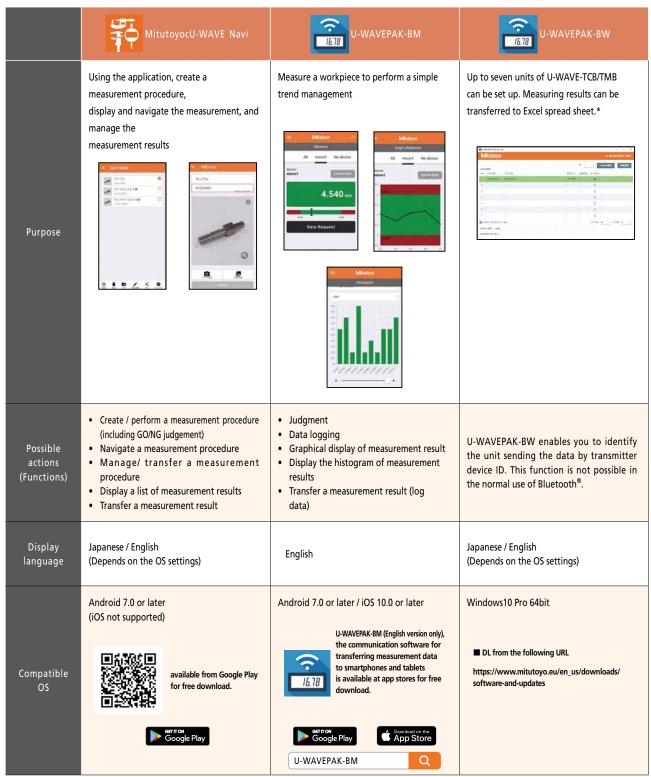

Digimatic calipers

#### Digimatic gage, connecting unit and transmitter combinations

		Assembled appearance	Connecting unit	Transmitter

Note1: We cannot guarantee the operation of this application and U-WAVE TMB/TCB with all Bluetooth equipped devices.

 $Note 2: Google\ Play\ and\ the\ Google\ Play\ logo\ are\ trademarks\ of\ Google\ LLC.\quad Apple\ and\ the\ Apple\ logo\ are\ trademarks\ of\ Apple\ lnc.$ 

<sup>\*</sup> By enabling the direct input feature within U-WAVEPAK-BW the results can be written directly to Excel. The results do not include the transmitter device ID. Use of our optional USB-ITPAK or MeasurLink software allows for data sorting by individual transmitter IDs.

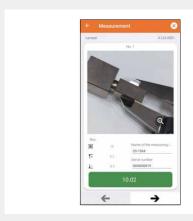

## Measurement Navigation Application Mitutoyo U-WAVE Navi

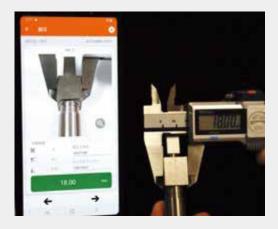

#### Navigates your measurements easily and steadily

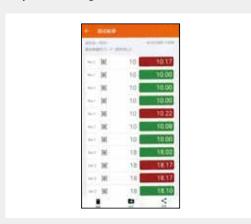

Mitutoyo *Bluetooth*<sup>®</sup> U-WAVE fit allows you to start measurements with your smartphone.

Images and text can be used to build a clear step by step measurement procedure. The app guides you how to measure and also shows you GO/NG judgment.

#### Easy data management

#### Data export to PC

Mitutoyo U-WAVE Navi is available at Google Play for free download.

Note: Google Play and the Google Play logo are trademarks of Google LLC.

#### MeasurLink

## Achieve "Visualization of Quality"

#### Collecting the measurement data

Measurement Data Wireless Communication System

**U-WAVE** 

#### **IoT of Quality Control**

Measurement Data Network System

MeasurLink

Configure the measurement network system MeasurLink using U-WAVE as a base

### What is **MeasurLink**®?

MeasurLink is an IoT platform for quality management that realizes "Visualization of Quality" by enabling real-time data collection from the networked Digimatic gages and global control and analysis. U-WAVE supports MeasurLink as an infrastructure that collects and controls data.

#### **Preventing defectives**

Collects data from the Digimatic gages on the network and performs statistical process control (SPC) to warn of possible generation of defectives.

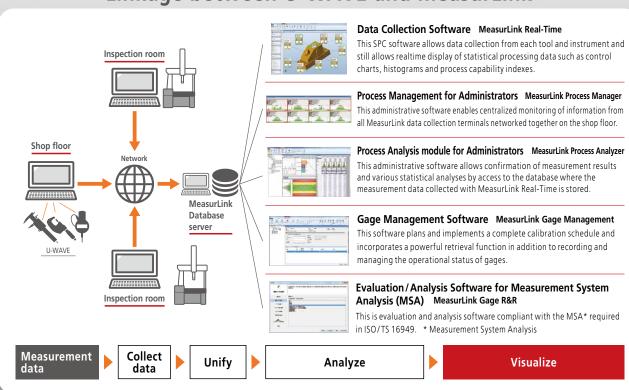

#### Diagnosis by data analysis

Checking measurement results by accessing the data base and performing various analyses helps investigate and resolve process performance concerns.

#### Simply start achieving IoT

In addition to conventional data storage, the network can be configured in steps to simply start IoT of Quality Control.

#### Linkage between U-WAVE and MeasurLink

Note: MeasurLink® is a registered trademark of Mitutoyo Corporation in Japan and Mitutoyo America Corporation in the United States

### Specifications

#### **Wireless Communication Specifications**

Product name	Wireless communication	Wireless communication distance	Transmission output
U-WAVE-T/TM/TC	Original (based on IEEE802.15.4)	Approx. 20 m (line of sight)	U-WAVE-T: 1 mW (0 dBm) or less U-WAVE-TC/TM: 2.5 mW (4 dBm) or less
U-WAVE-TMB/TCB	Bluetooth® 4.2 Low Energy	Approx.16 m (line of sight) Approx. 10 m (on shop floor)	3.2 mW 5 dBm) or less (Class2

Note 1: This product is a radio equipment classified in the 2.4 GHz Wide-band Low Power Data Communication System.

#### Transmitter (Refer to pages 12 and 13 for combinations.)

Product name	Model	Order No.	Protection level	Data reception indication	Power supply

### Mitutoyo

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.

## Find additional product literature and our complete catalog here.
